

Position: QA Engineer

We are seeking a skilled QA Engineer to join our dynamic team, collaborating across multiple development teams. The ideal candidate will play a pivotal role in automating tests and providing guidance to developers, enhancing the efficiency and effectiveness of our testing processes.

Reports To:

The role will report to the Director of Product and is a remote position.

AngelEye Health, Inc. offers you:

- A growth-oriented team environment where your strengths are highly valued
- Opportunities to expand your technical skills and knowledge with on-the-job learning/training opportunities
- employee health insurance premium

Company Mission Statement:

Equipping care teams and empowering families of neonatal and pediatric patients to improve outcomes.

Values and Core Beliefs:

- Patients and their families first; Hospital Partners a close second; Our Team and their families make it all happen.
- Curiously innovate; Failure isn't fatal, and success isn't final.
- Execute the basics at a PhD level.
- Create and Maintain a Sense of Urgency!
- Effective communication is key!
- Transparency and Honesty in everything we do.

Essential Duties and Responsibilities:

1. **Automated Test Development:** Design, develop, and maintain automated test scripts to ensure the robustness and reliability of software products across various projects.
2. **Cross-Team Collaboration:** Work seamlessly with our development squads to understand project requirements and implement comprehensive testing strategies.
3. **Test Coaching:** Mentor and coach developers on best practices for testing, fostering a culture of quality and proactive testing within the organization.
4. **Test Strategy:** Contribute to the creation and refinement of test strategies, ensuring alignment with project goals and industry best practices.
5. **Continuous Improvement:** Identify opportunities for process improvements and contribute to the evolution of testing methodologies within the organization.

Qualifications:

1. Proven experience in automated test development and execution, preferably in a startup or fast-paced environment.
2. Strong understanding of software development life cycle and Agile methodologies.
3. Excellent communication and interpersonal skills to effectively collaborate with cross-functional teams.
4. Ability to coach and guide developers in implementing effective testing practices.
5. Familiarity with testing frameworks and tools, Playwright in particular.
